

ISOC Armenia Chapter
12-month planned activities

ISOC Armenia Chapter has made its choice in its benevolent activity in the IT field of Armenia for helping vulnerable groups of population and vulnerable organizations serving the community. We are concentrating on those groups of people and organizations because there is a big digital divide between the habitants of the capital of Armenia and rural regions. The government is not able to take care of the needs of those people and organizations and the only hope is the help of NGOs and charitable/benevolent organizations.

Here are our 12-month planned activities according to our goals.

1. Participation in the Chapterthon 2021
Our Chapterthon proposal will be devoted to the named goals.

2. Cooperation on providing computers with Internet access and training to:
 - Rural library network
 - Victims of the recent war in Nagorno-Karabakh, young soldiers who became disabled because of losing hands, legs, eyes, etc.
 - Association of Healthcare and Assistance to Older People
 - "Pyunik" Disabled People Charitable Foundation
 - Blind and Visually Impaired People NGO
 - Adult Education and Lifelong Learning NGO
 - Rural schools
 - Rural cultural organizations (music/dance/handmaking groups)
 - Children of Armenia Fund

3. Present initiatives of Fundamentals program applicants.
ISOC Fundamentals Topics
 - Community Networks
 - Encryption
 - Infrastructure and Community Development
 - Internet Way of Networking
 - Open Standards for Web Servers
 - Securing Global Routing MANRS
